# What is Student Care?

---

While recognizing the non-traditional makeup of LBC's commuting student body, College leaders remain committed to providing services that contribute to the holistic development and care of every student. College life certainly is academics, yet so much more. We are passionate about seeing you, the student, develop spiritually, physically, intellectually, emotionally and socially.

Thus every student, on a semester by semester basis, is matched up with a professor who will serve as a caregiver by maintaining contact through the course of the semester. Students are paired with a faculty member who is on campus the same day(s) you are here for your classes. Contact information is provided both to the student and the faculty caregiver. Contacts may take place in person, by email, or by phone. What specific needs does Student Care meet?

## CHALLENGE

We all need to be challenged to move forward toward excellence. We want to challenge you to pursue God's call to Christian service. We want to challenge you to stretch beyond your comfort zone to attempt something bold and daring for the good of Christ's church. We want you to be challenged to do everything with your whole heart. Christ deserves nothing less!

## ASSISTANCE

At times, every person needs some help. Your caregiver stands ready to help you. When you struggle to keep up with all the demands, there is help to develop an ordered and prioritized life. When you need some help with course work or deciding how to write that research paper, your caregiver is there. When you need help finding the right resources for learning or to address a ministry need, assistance is available. When a College issue is troubling you, your caregiver can assist you in finding out where and how to address your complaint or grievance.

## RELATIONSHIPS

The relationships you build during your college years can last a whole lifetime. Even though we come and go on a very individualized schedule, it will be great to

have that special relationship with various faculty members throughout your college career. You will discover that your professors are people too. And the communication that goes on in the classroom will be enhanced by really getting to know one another personally. Your caregiver will also work to help you develop relationships with fellow students who understand more than anyone else, the demands of college life.

## ENCOURAGEMENT

Who doesn't get down occasionally? Every person needs an encouraging word, a touch of kindness, a real life demonstration of Christ's love to keep us going. Your caregiver CARES for you. We are committed to providing an uplifting and positive environment for you to learn God's Word and develop ministry skills for effective service in His church.
